

# Instructions for Liver Transplantation Donors and Recipients

Full 45-Slide Academic Presentation

# Introduction

- Overview
- Importance
- Liver transplantation purpose

# Liver Anatomy

- Liver functions
- Regeneration capability
- Blood supply

# Indications for Transplant

- Cirrhosis
- Acute liver failure
- Metabolic diseases

# Types of Transplant

- DDLT
- LDLT
- Split liver transplant

# Donor Eligibility

- Age limits
- BMI
- No chronic disease

# Donor Medical Tests

- Blood tests
- Imaging
- Liver biopsy

# Donor Psychological Evaluation

- Voluntary consent
- Emotional stability

# Donor Pre-Operative Instructions

- Smoking cessation
- Healthy diet

# Donor Lifestyle Prep

- Exercise
- Avoid alcohol

# Donor Medications to Avoid

- NSAIDs
- Herbals
- Anticoagulants

# Donor Surgical Risks

- Bleeding
- Infection
- Bile leak

# Donor Hospital Recovery

- Pain control
- Early mobility

# Donor Home Recovery

- Wound care
- Activity limitations

# Donor Long-Term Care

- Liver regeneration
- Follow-up tests

# Recipient Eligibility

- MELD score
- Organ failure severity

# Recipient Medical Tests

- Cardiac
- Pulmonary
- Blood tests

# Recipient Imaging

- Ultrasound
- CT
- MRI

# Recipient Vaccination

- HBV
- HAV
- Influenza

# Recipient Pre-Operative Prep

- NPO
- Medication review

# Recipient Lifestyle Changes

- Avoid alcohol
- Smoking cessation

# Recipient Nutrition Prep

- Balanced diet
- Protein intake

# Surgical Stages (Donor)

- Hepatectomy
- Vascular control

# Surgical Stages (Recipient)

- Explant
- Anastomosis

# Reperfusion Phase

- Monitoring
- Hemodynamic stability

# ICU Care (Recipient)

- Ventilation
- Fluid balance

# Immunosuppressive Drugs

- Tacrolimus
- Prednisone

# Immunosuppression Risks

- Nephrotoxicity
- Hypertension

# Post-Op Infections

- Bacterial
- Viral

# Rejection Types

- Acute
- Chronic

# Nutrition After Transplant

- Low salt
- Avoid grapefruit

# Physical Activity After Transplant

- Gradual increase
- Limit heavy lifting

# Psychological Impact

- Anxiety
- Depression

# Family Support

- Caregiver role
- Emotional support

# Outpatient Follow-Up

- Blood tests
- Clinic visits

# Long-Term Risks

- Cancer risk
- Recurrent disease

# Medication Adherence

- Lifelong requirement

# Nursing Roles

- Assessment
- Education

# Nursing Post-Op Monitoring

- Vitals
- Pain control

# Complications Overview

- Donor/recipient risks

# Ethical Considerations

- Consent
- Autonomy

# Legal Considerations

- No coercion
- Documentation

# Quality of Life Post-Transplant

- Work reintegration
- Lifestyle

# Survival Outcomes

- Short-term
- Long-term

# Global Statistics

- Transplant demand
- Success rates
