

Critical Thinking

Dr. Mayada Mahmoud

Stanford collage certified TOT

American Board TOT

Dale Carnegie certified Soft Skills

Chapter Objectives:

- At the end of this chapter, you will be able to:
- Define critical thinking.
- Understand the standards of critical thinking.
- Appreciate the principles of good argument and critical thinking.
- Understand the characteristics of critical thinking.
- Identify the barriers of critical thinking.
- Recognize the benefits of critical thinking.

Meaning of Critical Thinking

- Critical thinking :

It is the wide range of cognitive skills needed to effectively identify, analyze, and evaluate arguments and truth claims.

Meaning of Critical Thinking

- **Critical thinking in education**

It is a kind of thinking which you question, analyze, interpret, evaluate and make a judgement about what you read, hear, say, or write.

The term *critical* comes from the Greek word *kritikos* meaning “able to judge”.

Good critical thinking is about making reliable judgements based on reliable information.

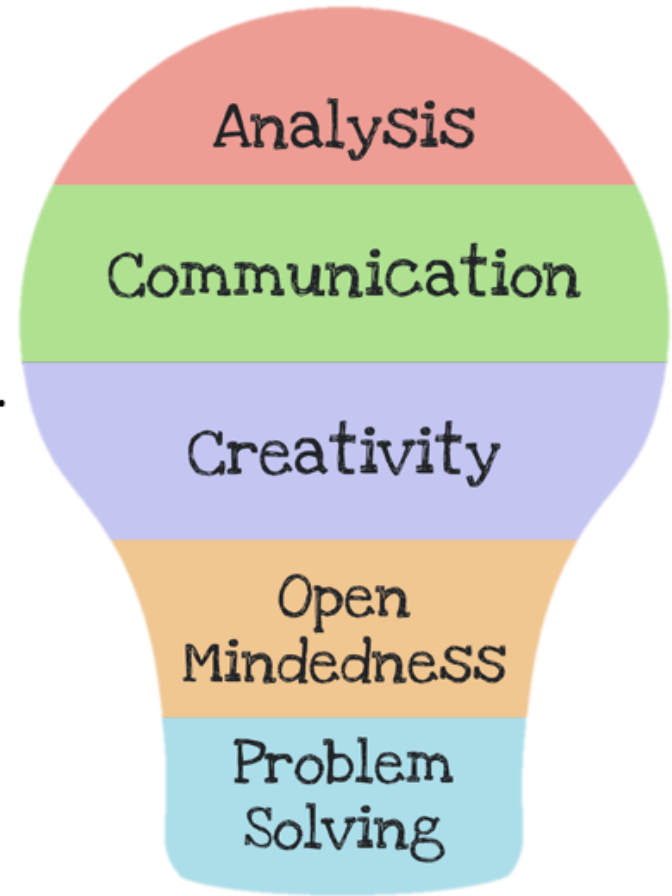

Meaning of Critical Thinking

- Applying critical thinking does not mean being negative or focusing on faults.
- It means being able to:
 - ✓ Clarify your thinking so that you can break down a problem or a piece of information,
 - ✓ Interpret it and use that interpretation to arrive at an informed decision or judgement.

Why Is It Necessary to Develop Critical Thinking Skills?

1. Earn new information, Understand complex concepts
2. Make better decisions.
3. The ability to be objective and reasonable can enhance personal and professional communication & relationships.
4. Critical thinking allow students to build on knowledge & analyze new understandings across various subjects.
5. Promotes problem solving.
6. Boosts creativity and curiosity
7. Improves career opportunities.
8. Builds open-mindedness

Components Of Critical Thinking

- Critical thinking consists of two components:
 1. A set of skills used to process information and beliefs.
 2. The act of applying those skills as a guide for behavior.

What is the critical thinking process?

- Critical thinkers evaluate evidence and analyze information before making a judgment.
- The process requires **higher-order thinking skills** such as:
 1. Sorting
 2. Analyzing ,
 3. Comparing data,
 4. Assessing logic and reason.
