

Critical Thinking

Dr. Mayada Mahmoud

Stanford collage certified TOT

American Board TOT

Dale Carnegie certified Soft Skills

The critical thinking process consists of five primary elements

1. Identify the claims. Organize arguments into basic statements and conclusions.

Identify Claims

2. Clarify the arguments. Look for conflicts statements.

Clarify Arguments

3. Establish the facts. Verify whether the claims are reasonable.

Establish Facts

5. Make the decision. Evaluate the argument using evidence, logic, and supporting data to increase the weight, contradictions, poor reasoning, or lack of evidence to decrease the weight.

Evaluate Logic

Make Decision

Characteristics & skills of Critical Thinking

- Strong critical thinkers possess a common set of personality traits and habits.
- Being aware of these traits and apply them can help us develop a strong critical thinking.

Characteristics& skills Of Critical Thinking

1. Curious

Curiosity is continually seek new information.

- **Actionable Tip:**

Choose to be curious. When you ask “**why,**” you learn about things around you and clarify conflicts . Google anything you are curious about, read new books, and play with a child. Kids have a natural curiosity that can be inspiring.

Characteristics of critical thinking(continue)

2. Analytical

Analytical thinking involves breaking down complex ideas into their simplest forms.

Being analytical is helpful for critical thinking because it allows us to look at data in detail.

Actionable Tip:

The Feynman Technique

3. Introspective

Introspection :

It is a process of examining our own thoughts and feelings.

We do this as a form of metacognition.

Metacognition:

It is self awareness and understanding of one`s own thought processes and, in practice, involves:

The planning, monitoring, evaluating and regulating of thought-processes.

Self-awareness encourages us to face our own biases and selfish tendencies.

Characteristics of critical thinking(continue)

- **The Metacognitive Cycle**

1.Planning The Learning Process:

Involves setting goals and determining the best strategies for learning.

- ✓ What is it I am actually trying to learn here?
- ✓ What search terms will produce good results?
- ✓ How might my current state of mind interfere with my learning?
- ✓ What are reliable sources of information that I can learn from?

Characteristics of critical thinking(continue)

The Metacognitive Cycle

2. Monitoring The Learning Process:

It is keeping track of one's understanding and performance during learning.

- ✓ Am I actually learning anything?
- ✓ Does this information seem trustworthy and reliable?
- ✓ How are my feelings impacting my thoughts?

Characteristics of critical thinking(continue)

- **The Metacognitive Cycle**

3.Evaluating The Learning Process:

- It is assessing the effectiveness of the learning process and outcomes.
- ✓ What evidence supports the knowledge I've gained through my research?
- ✓ What are the strengths and weaknesses of my approach to learning?
- ✓ How confident am I in my learning?
- ✓ What concepts did I find most difficult to understand?

Characteristics of critical thinking(continue)

- **The Metacognitive Cycle**

4. Regulating The Learning Process:

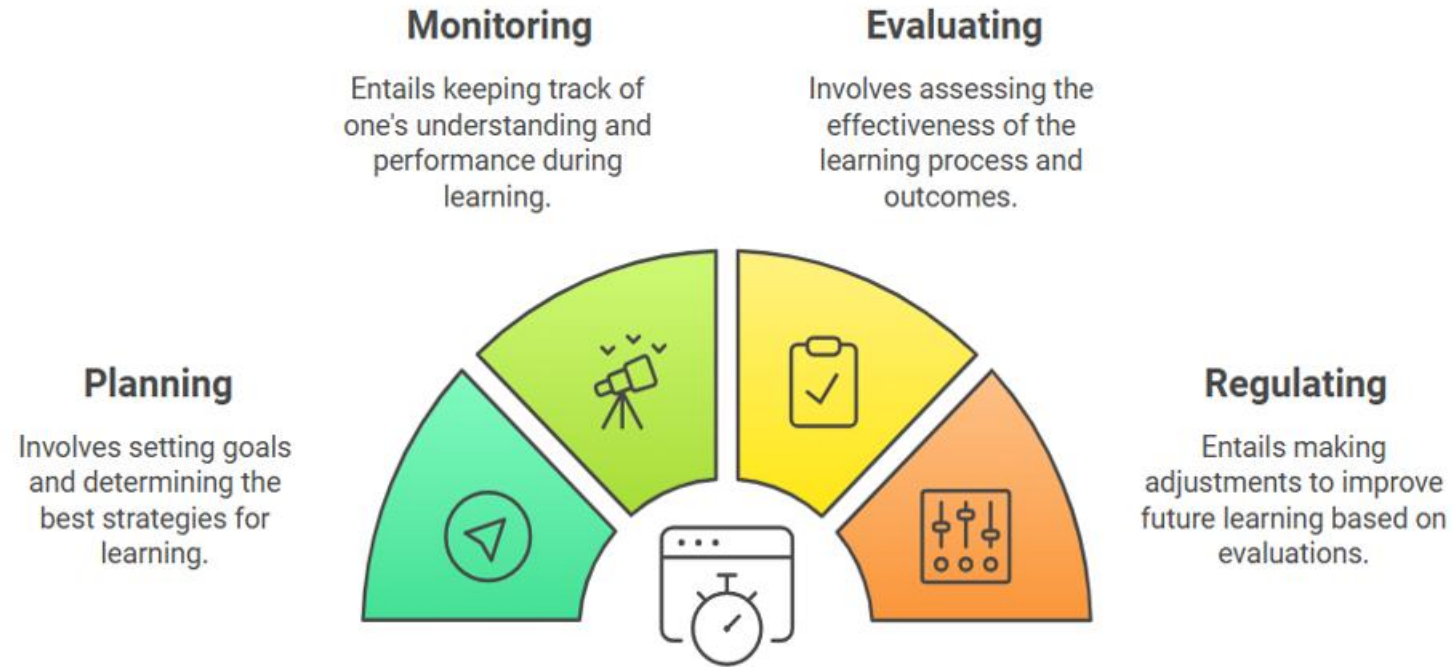

It is Making adjustments to improve future learning based on evaluations.

- ✓ What could I do differently in order to improve the quality of my learning?
- ✓ How can I deepen my understanding of this topic?
- ✓ Aside from internet research, what other sources might my research refer to?
- ✓ How can I improve my state of mind to find greater clarity on this matter?

Metacognitive cycle

4. Able to make inferences

Inference is logical conclusions based on reviewing the facts, events, and ideas available.

Analyzing the available information and observing patterns and trends will help you find relationships and make informed decisions based on what is likely to happen.

Actionable Tip:

- ✓ Keep an eye on your choices and patterns during the day, noticing when you infer.
- ✓ Practice applying the [Inference Equation](#)

5. Observant

- Observation is more than just looking — it involves arranging, combining, and classifying information through all five senses to build understanding.
- Being observant allows :
 - ✓ Collect more information about a situation and use that information to make better decisions and solve problems.
 - ✓ Facilitates seeing things from different perspectives and finding alternative solutions.

Characteristics of critical thinking(continue)

6. Open-minded and compassionate

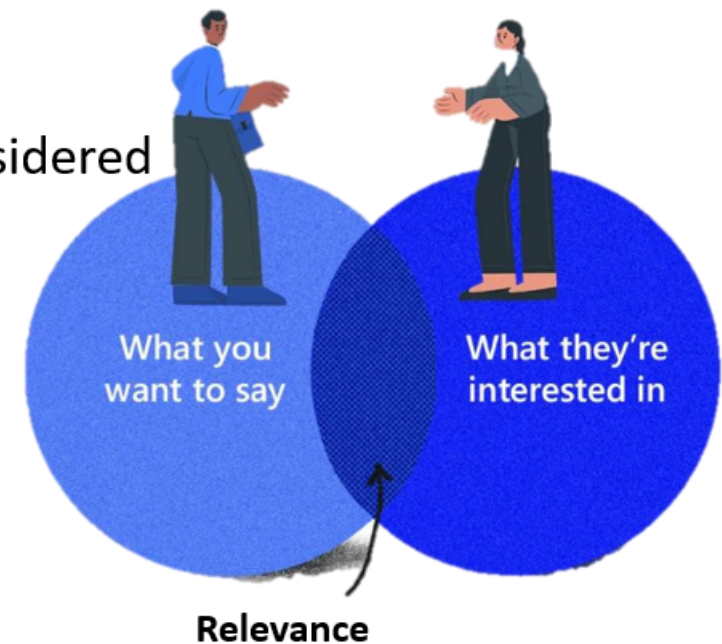

- ✓ Open-minded and compassionate people are good critical thinkers.
- ✓ Being open-minded means considering new ideas and perspectives, even if they conflict with your own.
- ✓ This allows you to examine different sides of an issue without immediately dismissing them.
- ✓ Using this deeper understanding, we can make better decisions and solve more complex problems.

Characteristics of critical thinking(continue)

7. Able to determine relevance

- **Relevance** :is defined as being logically connected and significant to the subject.
- When a fact or statement is essential to a topic, it is considered relevant.
- **Actionable Tip:**

When you're in a conversation, pay attention to how each statement relates to what you're talking about.

Characteristics of critical thinking(continue)

8. Willing

Willingness to inquire is the most fundamental characteristic of critical thinking

- Being willing goes hand in hand with other traits, like being flexible and humble.
- Flexible thinkers are willing to adapt their thinking to new evidence or arguments. Those who are humble are willing to acknowledge their faults and recognize their limitations.
- **Actionable Tip:**
- See challenges as learning opportunities.
- Celebrate others' accomplishments,
- and get curious about what led to their success.

Willing,
&
Able...
...to do something

Characteristics& skills of critical thinking(continue)

9. Effective communicators

Critical thinking requires people able to listen to each other's opinions and share their experiences respectfully to find best solutions.

- Being engaged in the discussion involves:
 - ✓ Listening to what they say
 - ✓ Being present
 - ✓ Asking questions that clarify their position

Actionable Tip:

The next time you speak with a friend, family member, or even a complete stranger, take the time to listen to what they're saying
