

Example of properties of technical English:

Emergency Report

Nursing Documentation – Emergency Department

1- Patient Identification

Patient Name: Mr. Ahmed Hassan

Age: 58 years

Gender: Male

Room Number: ER-12

Date: 22 February 2026

Time of Admission: 10:35 AM

2 - Chief Complaint

The patient presented with severe chest pain radiating to the left arm, associated with shortness of breath and diaphoresis.

3 - History of Present Illness

The pain started approximately 30 minutes prior to admission. The patient described the pain as crushing in nature and rated it 9/10 in intensity.

4 - Vital Signs on Admission

Blood Pressure: 160/100 mmHg

Heart Rate: 110 bpm

Respiratory Rate: 24 breaths/min

Oxygen Saturation: 89% on room air

Temperature: 37.2°C

5 - Initial Nursing Assessment

The patient appeared anxious and diaphoretic. Skin was pale and cool. Cardiac monitoring was initiated immediately.

6 - Emergency Interventions

Oxygen therapy administered via face mask at 6 L/min.

Intravenous access established in the right forearm.

ECG performed within 5 minutes of arrival.

Aspirin 300 mg administered as prescribed.

Continuous cardiac monitoring initiated.

7 - Medical Impression

Findings were suggestive of acute myocardial infarction. The cardiology team was notified immediately.

8 - Ongoing Monitoring

Vital signs were monitored every 5 minutes. The patient was prepared for transfer to the cardiac catheterization laboratory.

1- Precision

Blood Pressure: 160/100 mmHg

Heart Rate: 110 bpm

Oxygen Saturation: 89%

Pain rated 9/10

=> Not saying : "very high blood pressure"

2- Formal Tone:

The patient presented with severe chest pain.

=> Not saying: He felt really bad.

The patient appeared anxious.

=> Not saying: He looked scared.

3 - Conciseness :

Intravenous access established in the right forearm.

=> Not saying: The nurse who was working at that time tried to put an IV line in his arm.

4 - Technical Vocabulary :

Diaphoresis

Myocardial infarction

Intravenous

Cardiac monitoring

Catheterization laboratory

5- Logical Organization:

Patient Identification

Chief Complaint

History

Vital Signs

Assessment

Intervention

Monitoring

6 - Objectivity:

=> Not saying: I think the patient is very sick.

But:

Findings were suggestive of acute myocardial infarction.
