Al Ryada University of Science and Technology

Learning Objectives

1

Define learning, teaching, and Education

2

Identify components of education

3

Explain teaching-learning relationship

4

Describe teacher Competencies

Click any objective to jump to that section!

Introduction

"Education is a light that shows mankind the right direction to surge."

The purpose of education is not just making a student literate but adds rationale thinking, knowledgeably and self-sufficiency.

Creativity can be developed and innovation benefits both students and teachers.

TEACHING

Teaching is a deliberate process of facilitating learning. It involves planning, delivering, and evaluating instruction to help learners acquire knowledge, skills, and attitudes.

TEACHING

A Social Process with 3 Focal Points

Real-World Example

Scenario:

A clinical instructor demonstrates proper sterile technique in a simulation lab. She explains each step, shows the procedure, then observes students practicing while providing corrective feedback.

Teacher Action

Demonstrates & Explains

Student Action

Observes & Practices

Subject Matter

Sterile Technique

learning

Learning is a lifelong process of transforming information and experience into knowledge, skills, and attitude

LEARNING

***A permanent** change in capability*

1

Change Process

Causes change in knowledge, skills, attitude

2

Acquisition

Gaining knowledge, behaviors, skills, values

3

Observable Change

Individual's behavior or knowledge changes

4

Permanent Modification

Lasting change in thinking, feeling, doing

Education

Education is a dynamic process, which involves the interplay of educator, educand and the social forces to make an individual socially adjustable and responsible

EDUCATION

A systematic, sequential, logical process

The interaction between learning & teaching

4 Components of Education Process

1

Learning Environment

2

Teacher

3

Curriculum

4

Learner

Learning Environment

1

The learning environment in which a student learns and creates is one of the most important aspects of education.

There are standards by the government and authority for the location of schools and colleges.

An inclusive learning atmosphere helps everyone to grow simultaneously.

[Next →](#)

Teacher

The teacher is the most important factor in assuring the quality of education.

Teachers should be:

- Trained and skilled
- Have good communication skills
- Use appropriate teaching methods
- Provide materials that satisfy student requirements

3

Curriculum

The curriculum consists of guidelines of a given discipline.

It is the series of things a student must perform and experience to develop abilities that are helpful in learning and training.

[< Back](#)

[Next >](#)

Learner

The person who learns and experiences knowledge, attitudes, and skills.

Teaching-Learning **RELATIONSHIP**

Click to explore:

[7 Key Connections](#)

[Teaching-Learning Cycle](#)

[Affecting Factors](#)

7 Key Connections

Interdependent Process - Two sides of the same coin

Mutual Influence - Quality affects depth and outcomes

Shared Responsibility - Partnership for success

Dynamic Interaction - Constantly evolving relationship

Goal Alignment - Development of knowledge & skills

Communication Bridge - Transmits and internalizes knowledge

Contextual Framework - Within educational contexts

The Teaching-Learning Cycle

Click through each step in sequence

Factors Affecting the Relationship

Teacher Expertise

Pedagogical knowledge

Student Motivation

Prior knowledge

Materials Quality

Instructional resources

Learning Environment

Climate and atmosphere

Communication

Effectiveness

Assessment

Feedback mechanisms

Cultural Context

Social environment

Technology

Support systems

7 Teacher Competencies

1

Subject Matter - Deep content knowledge

2

Transactional - Communication strategies

3

Personal - Professional attributes

4

Co-Curricular - Clinical experiences

5

Evaluation - Assessment expertise

6

Management - Organized environments

7

Community - Healthcare collaboration

Key Takeaways

Teaching and learning are interconnected processes that require collaboration, quality environments, skilled teachers, relevant curriculum, and motivated learners.
