

TECHNOLOGIES OF TEACHING

E-Learning · Virtual Classroom · Blended Learning · Mobile Learning in Nursing

*Prepared by
Saeed Mohammed Abdelguid, Ph.D , MSc, RN*

LECTURE OVERVIEW

01 E-Learning

Definition, modalities, delivery methods, impact & challenges

02 Virtual Classroom

Features, benefits and real-world examples (MOOCs, Bootcamps)

03 Blended Learning

Types, benefits, hazards and the flipped classroom model

04 Mobile Learning

M-Learning devices, advantages, disadvantages & nursing uses

KEY DEFINITIONS

Technology

The systematic application of scientific or other organized knowledge to practical tasks.

Educational Technology

The use of technology to improve education — a systematic, interactive process for designing instruction or training used to improve performance. Also known as instructional or learning technology.

Core Purpose

Educational technology integrates technology into education to promote a more diverse learning environment and empower students to use technology alongside their regular assignments — improving efficiency, motivation, and access to learning.

TRADITIONAL CLASSROOM vs. E-LEARNING

Traditional Classroom

Classroom

Physical — limited size, synchronous only

Content

PowerPoint, transparencies, textbooks, library

Personalization

One fixed learning path for all students

Schedule

Fixed time and location dependent

E-Learning

Classroom

Unlimited — anytime, anywhere access

Content

Multimedia, simulation, digital library, on-demand

Personalization

Learning path and pace determined by the learner

Communication

Synchronous & asynchronous collaboration tools

E-LEARNING — DEFINITION & MODALITIES

E-Learning: Teaching using modern communication mechanisms — computers, networks, multimedia, and internet portals — to deliver information fast and cost-effectively, while enabling management, setup, measurement, and evaluation of learner performance.

FOUR MODALITIES OF E-LEARNING

Self-Paced Online

Individual learner accesses resources (databases, courses) via Intranet or Internet — e.g., solo online research.

Self-Paced Offline

Individual learner uses resources offline — hard drive, CD or DVD — without internet connection.

Group-Based Sync

Groups work together in real time via Intranet/Internet — includes text chat, audio/videoconferencing.

Group-Based Async

Groups work over time with delayed exchanges — e-mail lists, threaded discussions, LMS forums.

E-LEARNING — DELIVERY METHODS

Print & Text

e-Text, e-Textbooks delivered digitally via browser or app

Video

Streaming video, video tape, satellite transmission, cable TV

Audio

Streaming audio and audio tape for lectures and podcasts

Review & Exams

Electronic interactive assessments and traditional paper exams

Async Communication

Email, threaded discussions, weblogs, and online forums

Sync Communication

Live chat, videoconferencing and teleconferencing sessions

IMPACT OF E-LEARNING ON TEACHING & LEARNING

Improves efficiency in both learning and teaching

Increases learner motivation and deepens understanding

Promotes collaborative learning across distances

Gives new approaches to learning and working

Provides new ways of interacting and social skill building

Paves the way for personality development

Helpful for self-evaluation — wide reach and consistent

User-convenient, flexible, and rich medium for students

Addresses different learning and cognitive styles

Self-pacing for slow and quick learners — reduces stress and increases satisfaction

E-LEARNING — ADVANTAGES & DISADVANTAGES

✓ ADVANTAGES

Convenient

Self-service, on-demand, private, self-paced, flexible

Cost-Effective

Virtual environments, shared lessons, reduced material & travel costs

Consistent

Central content control — same quality for all learners

Media-Rich

Easier to understand, more engaging multimedia content

Repeatable

Access lessons as many times as needed

Easy Monitoring

Less admin work, more precise progress tracking

✗ DISADVANTAGES

Unmotivated learners or those with poor study habits may fall behind

Lack of familiar structure and routine may take getting used to

Students may feel isolated or miss social interaction

The instructor may not always be available on demand

Slow or unreliable internet connections can be frustrating

E-LEARNING — CHALLENGES & MOTIVATION TIPS

CHALLENGES TO E-LEARNING

Organizational Change

Institutions must restructure processes and administrative systems

Technical Infrastructure

Requires expertise, support systems, and reliable technology setup

Social Interaction

Loss of face-to-face contact affects engagement and program quality

Legal & Evaluation Issues

Data protection, cross-country regulations, and measuring effectiveness

TIPS TO ENHANCE MOTIVATION IN E-LEARNING

- 1 Grab learners' attention — visual variety, interactivity, multimedia, provocative questions
- 2 Improve learners' engagement with interactive and meaningful activities
- 3 Boost learners' confidence through achievable milestones and positive feedback
- 4 Increase learners' satisfaction with relevant, practical content
- 5 Encourage social interaction through forums, chats, and group work

VIRTUAL CLASSROOM — DEFINITION & FEATURES

A virtual classroom is an online teaching and learning environment where instructors teach remotely in real time using multimedia materials (slides, audio, video). It is the e-learning modality most similar to traditional classroom training — distinguished by its live, synchronous nature.

INSTRUCTOR CAPABILITIES

Moderate Participation

Control and manage student engagement and involvement

Display Materials

Share documents, slide decks, and multimedia files

Screen Sharing

Virtual whiteboard and real-time screen sharing features

Breakout Rooms

Divide participants into small groups for collaboration

Polls & Quizzes

Engage participants with interactive assessments

Record Sessions

Record, archive and manage session recordings

VIRTUAL CLASSROOM — BENEFITS & EXAMPLES

Distance Learning for Students

Enables working professionals, busy learners, and those with fewer financial resources to learn new skills.

Share & Monetize Training

Institutions can share and monetize courses without traveling — MOOCs, bootcamps, and online degree programs.

Grow Brand Presence

Universities can attract students beyond their geographic area by offering live virtual courses.

VIRTUAL CLASSROOM EXAMPLES

MOOCs

Massive Open Online Courses — Coursera, edX. Open enrollment, some accredited, free or fee-based.

Bootcamps

Intensive focused training in tech, design, or data — Thinkful, General Assembly, Galvanize.

Online Degree Programs

Full university degrees delivered virtually — recruiting online students beyond geographic limits.

MOBILE LEARNING (M-LEARNING) — OVERVIEW

M-Learning is a model of training that blends electronic and distance education with portable mobile devices such as smartphones and handheld computers — enabling anytime, anywhere learning.

KEY BENEFITS

Self-directed, individualized and self-paced learning

Interactive learning with engaging digital content

Promotes lifelong learning — education moves out of the classroom

Global delivery of learning materials

Complements and extends distance, online, and classroom learning

MOBILE DEVICE TYPES

PDAs / Pocket PCs

Palm-Pilots and handheld computers

Smart Phones

MP3, video and app-enabled mobile phones

M-LEARNING — ADVANTAGES & DISADVANTAGES

✓ ADVANTAGES

- Access lessons, video clips, and audio from anywhere — on buses, trains, public places
- Interaction with fellow students and instructors is a great help
- Portability — take your learning wherever you go
- Psychological factor — device ownership increases motivation and commitment
- Colorful, inviting material prompts repeated practice
- More affordably priced; large percentage of population already owns devices
- Flexible 24/7 access from any location
- Each student learns at his or her own pace
- Saves cost of learning materials and commuting expenses

✗ DISADVANTAGES

Size Inconvenience

Small screens limit content display and usability

Limited Storage

PDAs have restricted storage capacities

Battery Life

Short battery life and frequent changes are a nuisance

Rapid Obsolescence

Devices may become outdated quickly

Limited Bandwidth

Wireless bandwidth may decrease with more users

No Printing Capability

Printing requires a network connection not always available

M-LEARNING — USES IN NURSING EDUCATION

Drug Database Access

Quick access to current drug databases and nursing reference books at the point of care

Procedure Information

Ability to access step-by-step procedure information instantly during clinical work

Bedside Data Entry

Real-time bedside data entry for patient records and clinical documentation

Research & Teaching

Data collection for research activities and as a teaching support tool

Patient Health Management

Tools to support patient monitoring, health management, and care plans

Health Team Communication

Improved communication and coordination across the healthcare team

KEY TAKEAWAYS

Technology Is Transforming Nursing Education

E-Learning offers flexible, consistent, cost-effective, and media-rich education that promotes self-paced learning.

Virtual Classrooms replicate real-time interaction online — enabling MOOCs, bootcamps, and full degree programs.

M-Learning puts clinical tools, drug references, and patient management in nurses' pockets — anytime, anywhere.

Technology in nursing education improves health team communication, research, bedside care, and lifelong learning.

"Educational technology is not about technology — it is about learning."
